## Why Acupressure massage

Acupressure massage is a combination of Acupressure, gentle fascia release and energy Balancing based in TCM, help rejuvenate the

Bodes energetic and self healing system to Promote optimum wellness for long term health. Acupressure is a safe, painless alternative for treating. The initial intent of acupressure is preventive. In traditional Chinese medicine, we intend to maintain a free flow of Qi and blood so That the dog or cat remains healthy and able to fend off any potential internal or external Invasions that could lead to illness. If the Meridians flowing on a superficial level of the body suffer any kind of imbalance of Yin and Yang, the whole body can become compromised And allow pathogens to go deeper and deeper into the body. This is why it is so important to be Able to detect meridian imbalances and to Perform acupressure maintenance sessions. We are able to resolve issues at the meridian level before they penetrate into the body.
